Just click on the name in the menu on the left and see what more we have to offer! Homophone WorksheetsHomophones are words that sound the same but have different spellings. (examples: two / too / on, their / there / are) Read about the differences between their words, they are and there. Select the right word to complete each sentence.2. Sometimes they also have different pronunciations. (example: Take a bow. Tie bow.) Commonly confused words We have dozens of worksheets for teaching commonly confused words. These include some homophones such as too/on/two, hare/hair, break/brake. There are also similar-sounding words such as impact/effect, on/on, lay/lie, and many more. Synonyms and Antonyms Learn about synonyms and antonyms with these worksheets. Some words sound very the same, but they have different spellings. We call these words homophones. An example would be them and there. Although most speakers pronounce these words in exactly the same way, these two words have a completely different meaning. They are evidenced by ownership or ownership. There shows the location. Knowing the difference between theirs and there isn't really that important when you talk, but it is very important when you write. Things can get quite confusing for readers when a writer picks the wrong word from a set of homophones. Common basic state standards determine that students have to master the choice of words. This means that the student must be able to recognize when the word steal should be used instead of the word steel, and literally hundreds of other pairs such as steal and steel. So how can students prepare for this? In the same way that a person gets into Carnegie Hall: practice, practice, practice! To help with that, I created a lot of resources on homophones and word selection and posted them below. Homophones List 1 – Here are 25 practice issues on homophones.
